Clearing History in Chrome Browser

Computers are designed to remember the different sites that you have visited and record a history. When pages disappear or do not load properly it is time to clear your history (cache) – restart_ and try again.

Removing your History in the Chrome Browser.

1. Open up Chrome
2. Click on the (3) dots in the upper right corner.
3. Scroll down to More Tools
4. Click on Clear Browser Data

5. A “Clear browsing data” menu will appear:
6. At “Clear the following items from” – click on down arrow and choose – **the beginning of time**
7. Check off the following:
 - ✓ **Browser History**
 - ✓ **Download history**
 - ✓ **Cached Images and Files**
 - ✓ **Cookies and other site details**
 - ✓ Click on **Clear Browser Data**, then **RESTART** computer.
