

ChildWare

Adding a Developmental Outcomes Assessment

As part of the provider agreement, provider must implement programming based on a PA-approved early learning curriculum that is aligned to the PA Early Learning Standard and conduct continuous child observation to inform child outcomes **using an OCDEL approved assessment tool twice per year (fall and spring)**

- A provider must indicate within the note when the child was assessed (Fall/Spring). As well as any concerns identified during the assessment
 - Assessment is a critical piece in high-quality standards-aligned programs. Parents, teachers and caregivers are the most qualified to assess young children because they observe children in authentic environments, and are most familiar with each child's development and learning expectations
1. Access Child's Record
 2. Click on Health Tab
 3. Click on Health/Development Events
 4. Add Health Event

Family

The screenshot shows the ChildWare interface for a child's record. The 'Health' tab is selected and highlighted with a red box. Below it, the 'Health/Development Events' tab is also highlighted with a red box. A blue bar contains the 'Add Health Event' button, which is highlighted with a red box, and a search field labeled 'Search Health Event'. Below this is a table with the following columns: Health Event Name, Event Date, Completed By, Concern Identified, Referred To System, Referral Date, Assessment, Screening, Notes, Updated By, and Action.
